

March 6, 1974

the members of the committee is a bill that gives general consumer protection to the consumer in the State of Nebraska. It is a law and it's in effect in many other states, almost 40 states. And it differs with some of those states in the substantive rule making procedures and where half of the states in the United States have almost identical provisions as what I'm trying to place in LB327 or tougher legislation. It's legislation that's been well drafted. It's been thoroughly researched and been absolutely is....is a really good consumer protection bill. Now we've been told by Senator Murphy and those people, those lobbyists that are lobbying for his provision, that his bill is almost as good. But if his bill is almost as good, but if his bill is almost the same and will do the same thing, why are they so dead set against LB327 as proposed by myself? Now, I'd like to mention to some of those rural people here that have been voting against this bill and that's not everyone, but just give you an indication of what you might have to contend with, I have an ad here that's selling a grain bin. If you can imagine, a grain bin, and you all know what they are, but anyway, it says guaranteed for 20 years. Well, then you get the brochure and the contract that deals with these same grain bins and it says it's guaranteed for one year so they can reduce your.....once you read the fine print, you find out you have a guarantee for one year and then it's only guaranteed for that one year if it's set up to certain specifications and used in certain ways. Then the guarantee, most people say well it's guaranteed for 20 years, but then the guarantee excludes any damage that is done when the building falls down or develops a crack, like damage to your grain for one thing, all they'll replace under their guarantee and your expense of replacing it, as a matter of fact, they replace just the parts, is the piece of tin or the bolts that have actually proved faulty. So even here in the farm areas you've got to be very careful and this bill, LB327, as proposed by myself, will protect you and will give you a right of recovery against those people that have misled you in regard to a 20-year guarantee rather than a 1-year guarantee that you'd actually get. Many people when they hear the word guarantee think they're getting something when in fact they're getting very little. So I won't go on about this but I do think this is important. I am going to continue throughout the session to try if unsuccessful this time to get this bill passed because I think it is absolutely vital that Nebraska pass this bill this year so we can prevent any more consumer fraud or at least the majority of it in the State of Nebraska.

PRESIDENT: Senator Waldron, is your motion to return this bill LB327 back to Select File for specific amendment? Senator Murphy.

SENATOR MURPHY: Question of Senator Waldron.

PRESIDENT: Senator Waldon, will you yield? He'll yield.

SENATOR MURPHY: Under your new approach to this new bill you speak of, what department of government will the protection be in?

SENATOR WALDRON: The Attorney General.

SENATOR MURPHY: I believe the one I read said the Department of Labor.

SENATOR WALDRON: Well, that's an error, Senator. It's the Attorney General, you know we've been talking about the Attorney
